

.experience

- Sept 2019-Present **Engineering Manager, Mozilla.** Remote (from Durham, NC)
Managing several teams of engineers dedicated to supporting core Firefox services; Installer, Updater, Sync & Push. I'm focused on engineering processes, and working with my teams to execute on core company objectives.
- Apr 2019-Aug 2019 **Sr. Software Engineer, Wrangle.** Durham, NC
Designed and built data manipulation software. Wrangle was a very early stage startup (3 employees, closed doors in Aug 2019), where I wore a lot of hats in addition to writing code. I was responsible for design, front-end development, and product strategy.
- Apr 2018-March 2019 **Director of Product and Engineering, Automated Insights.** Durham, NC
Managed the flagship product for Automated Insights; Wordsmith. I led engineering, design, and product direction for Wordsmith. I was responsible for the teams working within all codebases supporting the platform, driving product and feature level decisions, and coordinating with the rest of the organization.
- Apr 2017-Apr 2018 **Software Engineering Manager, Automated Insights.** Durham, NC
Led a team of developers and designers supporting Wordsmith, AI's self-service NLG platform. I led projects, mentored engineers, and designed features within a Rails/Flask/Node/React stack. I was also responsible for hiring for the team.
- Feb 2016-Apr 2017 **Sr. Front-end Engineer, Automated Insights.** Durham, NC
Designed and developed features for Wordsmith, the company's flagship product. Worked closely with other engineers and product managers to prototype, release, and iterate on features within a Rails/Node/Angular stack.
- Jan 2015-Feb 2016 **Sr. UI/UX Engineer, Bronto Software.** Durham, NC
Led projects of varying sizes, from design to production on the front-end engineering team at Bronto. Worked closely with other engineers and product teams at Bronto to build and launch new features, and maintain existing web application.
- Jul 2012-Jan 2015 **UI/UX Engineer, Bronto Software.** Durham, NC
Worked with the front-end engineering team at Bronto, on the core Bronto Marketing Platform. Designed and built a variety of features within the web based enterprise application. Worked primarily within a Backbone.js and Zend PHP based stack.

.edu

- Sept 2002-May 2008 **Pratt Institute, Bachelor's Degree, Industrial Design.** Brooklyn, NY
Academic Merit Scholarship recipient for duration of studies. Additional achievements included participation in design and construction for IEEE sponsored museum exhibition in 2007-08.
- Jun 2006-Aug 2006 **University of Oregon, Summer Programming Classes.** Eugene, OR
Summer programming classes: HTML, CSS, JavaScript, Python.
