

.experience

Nov 2023-Present

CTO, Wrangle. Remote (from Durham, NC)

Hands on technical leader leading product and engineering efforts at Wrangle. I am responsible for all things product and engineering; people, processes, infrastructure, UX, and overall roadmap for the product. I lead a small team of engineers at this growing startup.

May 2022-Nov 2023

VP of Engineering, Wrangle. Remote (from Durham, NC)

Led engineering for an early stage startup focused on process automation in Slack. I was responsible for growing and supporting the engineering team. Worked alongside the founders to develop the roadmap and strategy for the company, and manage inbound product and technical requests.

Mar 2022-Apr 2022

Director of Engineering, Mozilla. Remote (from Durham, NC)

Responsible for ~25 engineers working on Firefox for Desktop, along with leading other major engineering and program initiatives across Mozilla. I managed a group of engineering managers and provided strategic input and guidance in support of technical teams working across multiple stacks.

Mar 2021-Mar 2022

Sr. Engineering Manager, Mozilla. Remote (from Durham, NC)

Led multiple groups of core Firefox development teams. Responsible for Add-ons, the Installer, the Updater, and OS integrations. Managed a group of engineering managers, providing guidance on roadmaps, career development, and alignment with company objectives.

Sep 2019-Mar 2021

Engineering Manager, Mozilla. Remote (from Durham, NC)

Supported several teams of engineers dedicated to building and maintaining core Firefox services; the Installer, the Updater, Sync and Push. Focused on improving engineering and operational processes, and working with teams to execute on organizational goals, and define technical roadmaps.

Apr 2018-Mar 2019

Director of Product and Engineering, Automated Insights. Durham, NC

Managed the flagship product for Automated Insights; Wordsmith. I led engineering, design, and product direction for Wordsmith. I was responsible for the teams working within all codebases supporting the platform, driving product and feature level decisions, and coordinating with the rest of the organization.

Apr 2017-Apr 2018

Engineering Manager, Automated Insights. Durham, NC

Led a team of developers and designers supporting Wordsmith, Automated Insights' self-service NLG platform. I led projects, mentored engineers, and designed features within a Rails/Flask/Node/React stack. I was also responsible for hiring and onboarding engineers and designers.

.education

Sep 2002 - May 2009

Bachelor's of Industrial Design, Pratt Institute. Brooklyn, NY

Academic Merit Scholarship recipient for the duration of studies. Additional achievements included participation in design and construction for IEEE sponsored museum exhibition on 2007-08.
